

Software Engineering and Project Management (Question Bank)

Unit - 1

1. What is Software? Explain types of software with example.
2. Explain characteristics of a good software.
3. What is Software Engineering? Explain 3-R of Software Engineering.
4. What is SDLC? Explain various phases of SDLC.
5. Explain Waterfall Model with its advantages and disadvantages.
6. Explain Iterative Waterfall Model with advantages and disadvantages.
7. Explain Incremental Model with advantages and disadvantages.
8. Explain Spiral Model with advantages and disadvantages.
9. Explain RAD Model with advantages and disadvantages.
10. Explain Agile Development Model with advantages and disadvantages.

Unit - 2

11. What do you mean by SRS? Explain characteristics of a good SRS.
12. What do you mean by requirement engineering? Explain types of requirements in Software Engineering.
13. What is forward engineering? Compare with reverse engineering.
14. Explain functional, non-functional and domain requirements of Hospital Management System.
15. What is feasibility study? Explain types of feasibility studies.
16. What is Software Requirement Analysis? Explain various activities involved in Software Requirement Analysis.
17. Explain the concept of software designing with abstraction, modularity, refinement and information hiding.
18. Explain functional independency.
19. What is cohesion in Software Engineering? Explain with types of cohesion.
20. What is coupling in Software Engineering? Explain with types of coupling.
21. Differentiate cohesion with coupling. Give examples of both.

- 22. What is testing? Explain types of testing.
- 23. Explain levels of software testing.
- 24. With example, explain the concept of Data flow diagram.

Unit - 3

- 25. Explain 4 P's of Effective Project Management in detail.
- 26. Explain PERT & CPM techniques in brief.
- 27. Explain the concept of Product metrics, Process metrics and Project metrics.
- 28. Explain Software Project management and W5HH principle.
- 29. Write a short note on Empirical estimation techniques.
- 30. Write a short note on Heuristic techniques.
- 31. Explain COCOCMO Model for project estimation with suitable example.

Unit - 4

- 32. What is risk? Explain categories of risk in brief.
- 33. Explain RMMM (Risk Monitoring, Mitigation, management) in brief.
- 34. Differentiate quality control with quality assurance.
- 35. Explain the concept of change control and version control in brief.
- 36. What is risk management? How the risks are evaluated in software projects?
